BUREAU OF ACCOUNTS

TRANSPORT STATISTICS IN THE UNITED STATES, 1984

PREFACE

The tables set forth in Transport Statistics are compiled from reports filed with the Commission by railroads and motor carriers. The current issue covers the reports for the calendar year 1984.

This is the thirty-first issue of Transport Statistics, superseding Statistics of Railways in the United States, which was published yearly by the Commission from 1887 to 1953, inclusive. Transport Statistics also replaces former publications, Summary Tables of the Annual Report on the Statistics of Railways in the United States and Preliminary Abstract of Railway Statistics. The present form of publication permits easy assembly of parts and portions desired in a standard loose leaf binder. When complete, Transport Statistics comprise the following two parts numbered as indicated:

Part 1. - Railroads
Part 2. - Motor Carriers

Each part, or release thereof, is issued separately.

PUBLICATIONS PREPARED BY THE BUREAU OF ACCOUNTS, SECTION OF REPORTS

ANNUAL

Transport Statistics in the United States. Detailed data on traffic, operations, equipment, finances, and employment for carriers subject to the Interstate Commerce Act.

A-300 Wage Statistics of Class I Railroads in the United States-Calendar Year. Number of employees, service hours, and compensation by occupation: Professional, clerical, and general; maintenance of way and structures; maintenance of equipment and stores; etc.

QUARTERLY

Large Class I Motor Carriers of Property Selected Earnings Data. Operating revenues, net carrier operating income, net income, revenue tons hauled, operating ratio and rate of return.

Class I Line-Haul Railroads Selected Earnings Data. Railway operating revenues, net railway operating income, income before extraordinary items, net income, revenue ton-miles of freight and rate of return.

Large Class I Motor Carriers of Passengers Selected Earnings Data. Operating revenues, net carrier operating income, net income, revenue passengers carried, operating ratio and rate of return.

Large Class I Household Goods Carriers Selected Earnings Data. Operating revenues, net carrier operating income, net income, revenue tons hauled, operating ratio and rate of return.

MONTHLY

M-350 Preliminary Report of Railroad Employment, Class I Line-Haul Railroads. Number of employees at middle of month, group totals.

NOTE: Beginning with the 1980 publication, Parts 3, 4 and 5 have been discontinued.

PART 1: RAILROADS

INTRODUCTION

Railroad operating companies are those whose officers direct the actual transportation service and whose books contain operating as well as financial accounts. Lessor companies maintain a separate legal existence, but their properties are operated by the lessees, who may or may not be financially interested in the securities of the lessors. The reports of lessor companies contain only financial accounts. Proprietary companies, as the term is here used, are inactive corporations; that is, railroad companies which neither operate property nor administer their financial affairs and which have been practically absorbed by the controlling railroad corporations which own or control the entire outstanding capitalization, both capital stock and funded debt. Proprietary companies are operated by railroad companies or affiliated system corporations without the parent companies being required to make any accounting to the proprietary corporation. The Commission excuses a proprietary company from filing a separate report but information regarding its mileage, investment, and capitalization appears in the report of the parent company.

Switching and terminal companies are those operated separately for joint account or for revenue and (a) performing switching service only; (b) furnishing terminal trackage or facilities only, such as union passenger or freight station, etc., for which a charge is made; (c) performing both switching and terminal services; (d) operating bridges and ferries exclusively; or (e) primarily performing switching or terminal services but also conducting a regular freight or passenger traffic. It should be observed that such services as those afforded through switching and terminal companies are mostly performed directly by the line-haul carriers as an ordinary part of their business.

Railroad operating companies are classified for statistical purposes on the basis of adjusted annual operating revenues for three consecutive years. Effective January 1, 1978, the classification is: Class I, $50,000,000 or more; Class II, less than $50,000,000 but in excess of $10,000,000; and Class III, less than $10,000,000. In 1976 and 1977, the classification was: Class I, $10,000,000 or more; and Class II, under $10,000,000. Between 1965 and 1975, the classification was: Class I, $5,000,000 or more; and Class II, under $5,000,000. From 1956 through 1964, the classification was: Class I, $3,000,000 or more; and Class II, under $3,000,000. Prior to January 1, 1956, this classification was: Class I, $1,000,000 or more; Class II, more than $100,000 but less than $1,000,000; and Class III, under $100,000.

Commencing with 1960, data from railroad companies operating in Alaska are included in all applicable tables.

NOTE: Beginning with 1981, only Class I Railroads were required to file annual reports.

GEOGRAPHICAL GROUPINGS

The districts to which the railroads have been assigned for statistical purposes are shown on the accompanying map (P.II). In some cases, especially where the operated mileage of a road does not lie wholly in a single district, arbitrary assignment of the carrier is made on the basis of location of the major portion of operation.

SECTION A-1

ABSTRACTS OF REPORTS RENDERED BY CLASS I OPERATING RAILROADS

EXPLANATORY NOTES

Section A-1 is devoted to statistics compiled from reports rendered by operating railroad corporations of Class I. Effective January 1978, Class I railroads were those having $50 million or more of gross revenues annually. Effective January 1, 1982, the Interstate Commerce Commission adopted a procedure to adjust the Class I threshold to reflect inflation and to reduce the reporting burden on Class II railroads that may eventually reach the threshold. This decision in Docket No. 38559 uses the Bureau of Labor Statistics Price Index for Railroad Freight to deflate current dollars to 1978 dollars. A carrier may not be reclassified until it has experienced a difference in classification for three consecutive years. The current dollar basis for Class I carriers for 1984 is estimated at $87 million. The summaries of statistics in this section are grouped by districts, and appear as Table 1 through 10. The names of the individual railroads are arranged alphabetically.

The individual railroad corporations are presented in series. For each series appropriate statistics are given, so arranged that the figures for a particular corporation are shown on consecutive pages. Such particulars are shown in the following order:

General balance sheet statement
and Investment in Property
Results of operations
Retained income--Unappropriated
Classification of tracks
Railway operating expenses
Depreciation
Equipment in service
Operating statistics

In some cases the designations of items used in this section are condensed slightly from the titles of prescribed accounts or of items in the annual report form, but they seem sufficiently clear to prevent misunderstanding.

Entries for the "Dr." items in Operating Revenues, the "Cr." items in Operating Expenses, and, in general, for deficits and other reverse or negative items are indicated by a minus (-), before figures.
